Journal Vault

The digital management system for
journal storage, print and global distribution

Journal print and distribution just became much easier

As a journals publisher, your core activities are to commission, peer-review, edit, publish and disseminate distinguished articles for your subscribers. Part of this process will also include ensuring the timely production, storage and distribution of your journals. These activities are clearly also vital to your success, but may stretch your resources significantly.

How Journal Vault can help

With Journal Vault, you can take advantage of the expertise that Printondemand-worldwide has developed in becoming one of the world's leading specialists in digital printing, storage and distribution. Journal Vault is a software solution that will allow you to store, update, digitally print and distribute your journals. Journal Vault achieves maximum efficiency but makes minimal demands on your time.

Please see the following pages for more details, or contact us using publisher@printondemand-worldwide.com or by telephoning 01733 237867.

Journal Vault Explained

Journal Vault Features

Journal Vault is the latest member of PODW'S growing family of software solutions for publishers and learned societies. It joins BookVault, our print-on-demand book print and global distribution package, and E-Vault, our e-book creation and global distribution facility.

Journal Vault is a 24/7 web-based management system which will enable you to:

- Digitally load and update your journal files
- Print (including single copy POD), and despatch your journals and track their progress
- Manage and modify your subscription lists online
- Access sophisticated sales analytics
- Save the money you currently spend on costly warehousing facilities
- Eliminate costs incurred from stock surpluses
- Manage catch-ups and claims
- Manage article reprints (coming soon)

How do I know that Journal Vault is right for my journals?

Whatever the size of your publishing house or learned society, however large or small your journals portfolio, Journal Vault will simultaneously enhance your offer and cut down your costs. As a world-class digital printer, PODW offers competitive pricing combined with a range of binding and finishing options that is both flexible and comprehensive. We'd be delighted to discuss your particular requirements in order to construct a tailored package exactly suited to your needs.

Our web-based system is secure, password-controlled and easy to use. It will enable you to:

Upload:

- Your content and cover files
- Your subscriber details

Edit:

- Gain instant revision capability
- Add, remove or replace your print files
- Add, remove or replace your subscribers' details

Print:

Journal Vault will give you high-quality digital mono or colour journals with a range of binding options:

- As your main print run
- For additional copies (from one copy) for new subscribers or marketing use
- To supply new subscribers with back issues
- Catch-up and claims
- Article reprints (coming soon)
- Supply POD printed contributor copies for e-only journals without the need to buy short stock

Despatch:

- Customised paperwork will be included as if it came direct from you
- Delivery will be trackable (optional)
- We'll pack your marketing materials with your journals, if you wish

Analyse:

- You'll gain access to a high-powered analytics package
- The analytics are absolutely free as part of the Journal Vault service

Additional conversion and metadata services

Detailed and structured metadata is vital to allow your content to be discovered and purchased online. PODW works with market leaders to provide conversion and metadata services for journals publishers. The XML services provided by our conversion partners can convert your back catalogue and enable you to launch a new digital-format title simultaneously with its print counterpart. The XML workflow process can be combined with a variety of authoring tools to create a custom DTD (document type definition) that can be used for both digital and print-ready output.

*These are paid services; please contact us for details at:
publisher@printondemand-worldwide.com*

**GIVES
YOU CONTROL
SAVES
YOU TIME
AND MONEY**

Why use Journal Vault?

- To free up your in-house publishing team from time-consuming stock and subscription management activities
- To manage your journals content in a secure digital repository
- To dispense with storage costs and eliminate cash tied up in physical stock of e-only journals
- POD cost-effectively supports print requests for e-only journals
- To eliminate problems caused by under-printing or print surpluses
- To allow your customers to take advantage of a completely flexible ordering facility
- To be able to include your own paperwork and marketing materials with despatches
- To understand your business better by using the comprehensive sales analytics package
- To allow you to track the whole process, from real-time uploading through production to delivery
- To quickly and efficiently manage your subscription list
