

Journal Vault

Now you can apply our cutting-edge, high-quality POD, printing and distribution services to all your journal needs

Outline:

- A sophisticated user-friendly, web-based journal production management system
- Manage all first-run journal production, catch-up and claims in one integrated production management system
- Full subscriber management and reporting functionality
- Direct mail and distribution capability
- True print-on-demand model for both mono and colour journals
- Wide and flexible paper and binding choices: it's your spec, not ours
- Suitable for any size and type of journal publisher
- Affordable POD and short-run colour and mono journals from as low as one copy
- Allows you to manage your content in a secure digital repository

We cover all the options!

We also offer, among other services:

- POD as a stand-alone service and as a wholesale/retail model
- Ebook conversion and distribution
- Short and long-run printing, direct mail and a new direct-to-consumer retail via:

The Great British Book Shop
www.thegreatbritishbookshop.co.uk

Features and benefits

- Allows you to manage, not just store, your content in a secure environment
- Eliminates the cost of storage and the problem of over and under-printing
- Totally flexible ordering for you and your subscribers
- Ability to include marketing material on despatch
- Includes a free, comprehensive sales analytics package
- Real-time uploading and tracking through production to delivery
- Hierarchical access levels for subscribers

"The system (Journal Vault) will save us a great amount of time and effort! Printondemand-worldwide has shown it works to provide business solutions to more than just our printing needs."

Jeanette Brooks, Publications Manager at Inderscience Enterprises Ltd
